Wood Industry

Fill Material

For every application, we have a fill material. You can choose from many wires, synthetics, fibre bristles and a special nylon with special grit. We can offer a wide range due to each application needing a specific material. Our high quality materials can be heat or acid resistant. Whatever is required - we can meet your needs.

Abrasive nylon - enlarged

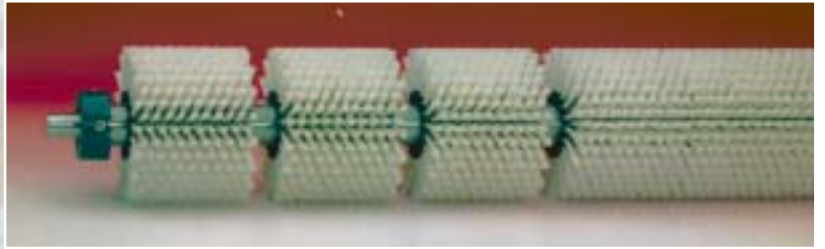

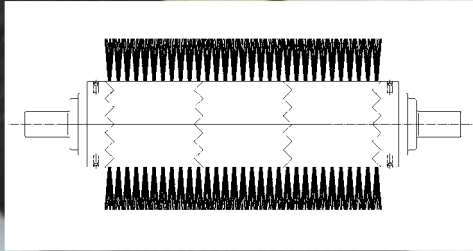

Multi-Filament Bristles

These bristles are available as abrasive or non-abrasive. They consist of a number of single filaments which are then braided spirally with a nylon material.

These multi-filament bristles are high quality. Compared with conventional mono-filaments, this material has an extended life cycle.

MultiZack Brush System

The MultiZack Brush System for many applications

MultiZack brushes show an extended lifecycle even under extreme conditions. Easy mounting of the brush bodies enables quick and easy changeover, also a wide range of fill materials are available. The brush bodies are resistant to acid, and suitable for the food industry. They are light-weight, and they display an excellent accuracy of rotation.

Punched Roller Brushes

Punched Roller Brushes can be manufactured in different lengths, forms and diameters, and with the many different fill materials. Punched roller brushes are manufactured with wood or plastic bodies, also can be supplied with a steel shaft if requested. With the almost unlimited possibilities of construction, we are able to offer made to measure punched brushes for every application. Our range of fill materials includes:

- steel wires and stainless steel wires, straight or crimped, diameter 0,15 - 0,5 mm
- synthetic filaments made of Nylon or PPN, straight or crimped, diameter 0,10 - 1,4 mm
- abrasives with different grit sizes, diameter 0,25 - 1,5 mm
- natural hair: horsehair, goat hair, pig hair, cow hair
- fibres: tampico fibre and coconut fibre

These punched roller brushes are renowned for easy mounting, high efficiency and many material advantages.

Application Areas:

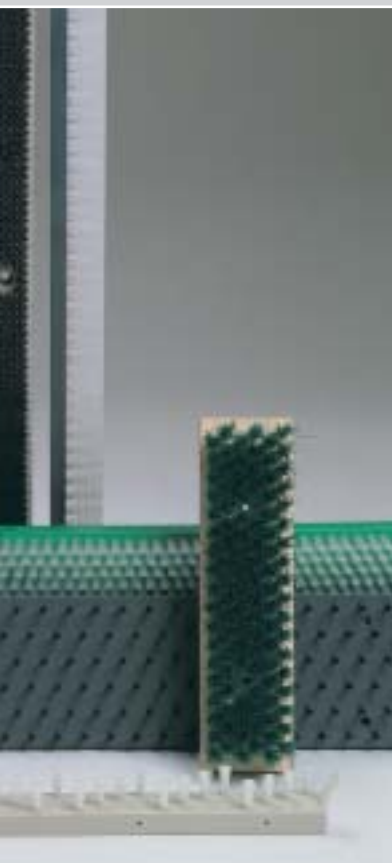

These products can be used for cleaning, transporting, applying, structuring, pressing, degreasing, dust removal, sweeping and many more.
